The first part was  
to explain the context

I put the answer as  
it so happened  
The next part was  
to narrate the events  
I failed terribly as  
my version was a jargon.

The third part was  
the most tough one  
To find out the trues  
out of the false ones.  
I ticked what I felt.....

But the trues I put  
were not convincing  
were all wrong to them.

The last part was  
to get the blanks filled  
I was puzzled and  
needed your help

'You' who knew the answer  
remained indifferent

The result, I am sure;  
but not afraid of  
B'se the wrongs also  
have certain rights  
And the rights often  
can go wrong

If I fail, I have  
no other options  
As it was  
my last chance

It was my last chance.
